SUMMARY

Senior Software Engineer with a background in Web3 and fintech. Strong full-stack delivery across React/Next.js front-end and TypeScript/Go/Java back-end systems, with hands-on ownership of API architecture and serverless pipelines. Product-oriented engineering leader focused on team performance, delivery execution, and scalability.

- TypeScript, JavaScript, Go, Solidity, Java, Scala, Python
 - React, Next.js, Node.js, Express, web3.js, Safe, ethers.js, Alchemy, Web3Auth, Tailwind CSS, NestJS, Nx
 - API design (RESTful, GraphQL, tRPC), microservices, serverless, Lambda, blockchain, Web3, dApp, EVM L2
 - Docker, Kubernetes, Terraform, Git, Jira, DevOps, CI/CD, KSH, Bash, Unix, SEO
 - PostgreSQL, MongoDB, Oracle DB, MySQL, Vercel, Firebase, Google Cloud, AWS, ORM (Prisma, Sequelize)
 - Agentic Engineering, Generative AI, Cursor, Claude Code, OpenAI API
-

PROFESSIONAL EXPERIENCE

Tea.xyz (Remote) - Open-Source Software Web3 startup, 1M users Mar 2024 – Present

Lead Software Engineer

Skills: TypeScript, Solidity, React, Tailwind, Node.js, ethers.js, Alchemy, Web3Auth, tRPC, lambda, AWS, PostgreSQL, Prisma, EVM L2

- Implemented ERC-4337 Account Abstraction to onboard Web2 users and sponsor gas fees.
- Integrated custom smart contracts into the frontend.
- Led spam detection initiative using zkPass KYC attestations and FingerprintJS.
- Owned delivery of DAO governance functionality using the Tally API, coordinating across stakeholders.
- Mentored engineers and set technical direction across frontend and backend systems.

Productfy (Remote) - B2B fintech platform for corporate card management Jan 2023 – Feb 2024

Senior Full-Stack Software Engineer

Skills: TypeScript, GraphQL, Go, Java, React, NextJS, Tailwind, Node.js, lambda, AWS, Docker, PostgreSQL, Sequelize

- Developed the MVP of a digital banking web application for 10K users, utilizing Next.js for the front-end and a Golang API for the backend.
- Partnered with the risk management team to automate the intake of financial transaction data with Unit21 API.

Prism (Remote) - Web3 startup Feb 2022 – Jan 2023

Lead Software Developer

Skills: TypeScript, React, NextJS, Vercel, Firebase, Google Cloud, Node.js, MongoDB, Web3, SEO

- Collaborated with the CTO to define the technical roadmap and lead MVP delivery.
- Implemented data scraping with OpenSea, 0x, and Rarible APIs for the NFT marketplace.
- Built a Discord bot to collect and analyze user statistics and improve user engagement.

Rally (Montreal, QC) - Web3 startup, creator monetization platform, 100K users Jan 2020 – Jan 2022

Senior Backend Software Engineer

Skills: TypeScript, Scala, API Design, GraphQL, microservices architecture, React, AWS, serverless, Docker, Kubernetes, Terraform, Web3

- Launched the Public API gateway project with Swagger documentation and led a team of 3 engineers.
- Maintained API uptime above 99.9% by setting up Datadog production monitoring and alerts.
- Increased sales by implementing Coinbase API payments.
- Hired and onboarded new engineers, led knowledge transfer sessions, and conducted peer reviews.

Amdocs (Montreal, QC) - Multinational telecom B2B company Mar 2011 – Aug 2019

Software Developer

Skills: Java, API Design, RESTful APIs, Oracle DB, Bash, Unix

- Developed, customized, and maintained software solutions for large telecom operators in Canada and LATAM.
 - Worked closely with enterprise clients to address complex business and technical requirements.
-

EDUCATION

Technion – Israel Institute of Technology, Haifa, Israel

Sep 2006 – Aug 2010

B.Sc. in Computer Science
